

Moordale SC Emergency Covid Action Plan

The Mooredale Sports Club will ensure that the COVID19 virus does not spread any further and that the infected person(s) is removed from training/sports activities and receives immediate care from health professionals. Martine Eleuteri Sports Club Manager will oversee the emergency action. She has thorough knowledge of the protocols that need to be enacted to ensure procedures and practices are followed.

The key elements of this COVID-19 Emergency Action Plan are identified in the following three sections, which outline the key roles and responsibilities of MSC staff in each of the three (3) pandemic phases.

- 1. Pre-pandemic Phase: This is the critical stage for COVID-19 pandemic preparedness. The pre pandemic phase is NOW, and planning efforts need to focus on education of our club membership (i.e., volunteers, staff, coaches, parents, players, match officials) on Ontario Soccer and Canada Soccer's Return to Play Plan and Protocols. Please note that the Return to Play Protocols comply with the Province of Ontario emergency orders and health authority directives. In addition, coordination with facilities (especially if third-party) should be included as they may have additional plans & procedures in place.
- 2. Positive Test Phase: Confirmation of a COVID-19 positive test within our club will activate our COVID-19 Action Plan. During this phase, the key goals will be to prevent further infections within our organization and minimize program disruption. This phase remains active until the infected party has been isolated and under the control of professional health authorities and there is no further threat to the health and safety of our Sports club players, staff, parents and community members.
- 3. Post-pandemic Phase: The post-pandemic period begins when the Provincial Health Officer declares that the COVID-19 pandemic is over, and state of emergency has been lifted. The primary focus at this time is to restore normal services, deactivate pandemic response activities, review the impact, and use the lessons learned to guide future emergency response planning.

Pre-Pandemic Phase:

Isolate and/or Transport Those Who are Sick at Club/Academy Activities

Make sure that coaches, staff, officials, players, and families know that sick individuals should not attend a Sports Club activity, and that they should notify officials if they (staff) or their child (families) become sick with COVID-19 symptoms, test positive for COVID-19, or have been exposed to someone with COVID-19 symptoms or a confirmed or suspected case.

Coaches, staff, officials, and players with COVID-19 symptoms (i.e., fever, cough, shortness of breath) at any club activity must be immediately separated and isolated. Individuals who are sick should go home or to a healthcare facility, depending on how severe their symptoms are, contact their Family Physician, and follow Health Agency guidance for caring for oneself and others who are sick. Individuals who have had close contact with a person who has symptoms should be separated and sent home as well. If symptoms develop, individuals and families should follow Health Agency guidelines for caring for oneself and others who are sick.

Establish procedures for safely transporting anyone who is sick to their home or to a healthcare facility. That means having parent contact information readily available; parents within a safe, socially distanced but easily accessible waiting area; or if you are calling an ambulance or bringing someone to the hospital. If calling an ambulance, please alert them that the person may have COVID- 19.

Clean and Disinfect Areas

Close off areas used by a sick person and do not use these areas until after cleaning and disinfecting them (for outdoor areas, this includes surfaces or shared objects in the area). Ensure safe and correct use and storage of cleaning and disinfection products, including storing them securely away from children.

Notify Local Health Officials and Close Contacts

In accordance with Federal, Provincial and Territorial privacy and confidentiality laws and regulations, the SPOC should notify local health officials, Provincial or Territorial Associations, club staff, officials, and families immediately of **ERP Lead**

Team Head Coaches

ERP Lead

any case of COVID-19 while maintaining confidentiality in accordance with applicable laws and regulations.

SPOC should work with local health officials to develop a reporting system (e.g., letter) to notify health officials and close contacts (logs and/or contract tracing information) of cases of COVID-19.

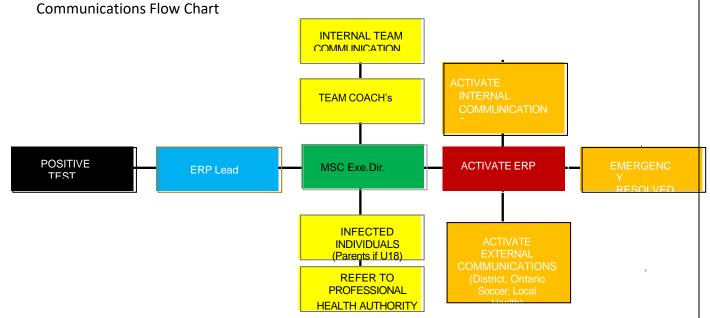

The Provincial and Territorial Health agencies and their Contact Tracing procedures will be responsible for advising those who have had close contact with a person diagnosed with COVID-19 and determine whether someone should stay home and self-monitor for symptoms. Members of the Sports Club/ should continue to self-monitor for symptoms.

The SPOC must notify the Provincial or Territorial Association of any cases of COVID-19. A weekly reporting system should be instituted for SPOC to advise the Provincial or Territorial Association of any cases of COVID 19, suspected cases, and where athletes or staff have been refused admittance to any training session. Even if there are no suspected cases, a 'nil' report should be required.
